

AROL SpA and Tirelli srl announce important partnership

AROL SpA – global point of reference in the design and production of capping and corking systems – has signed, on April 27, 2018, an important partnership with TIRELLI srl of Porto Mantovano, specialist in fillers, cappers and labelers, mainly for the cosmetic industry.

The Partnership with TIRELLI confirms the industrial project and the growth strategy of the Group – of which are also part FT System and Lpro (specialists in non-destructive inspection and quality control both in line and in laboratory) and UNIMAC-GHERRI (which produces linear cappers and fillers for food glass containers with twist-off caps) – with the objective of expanding its offer, integrating it with high-tech machines for primary packaging, guarantee of high quality standards and consumer protection.

The great TIRELLI'S experience in the cosmetic sector today is being added to AROL, FT SYSTEM and UNIMAC-GHERRI skills in soft drink, mineral water, wine & spirit and food sectors - for which every year more than 750 closure systems and more than 500 inspection and control systems are produced.

AROL group can now count on more than 750 specialists, in its 5 production plants and 14 operational branches in 4 continents, with over 31.400 machines installed in the world.

“We are particularly pleased to have enriched our offer to our customers with the technologies developed by TIRELLI, from over 50 years synonymous of quality and reliability in filling, capping and labelling systems for the personal and home care sectors” said Alberto Cirio, CEO of AROL SpA. “Thanks to the integration in AROL, we will be able to expand quickly our commercial presence and after-sale all over the world, as well as to implement our production capacity, planning our processes in a Lean perspective and realizing the digital development of our systems, for a perfect integration in the last generation smart factories” said Roberto e Giacomo TIRELLI, CEO of TIRELLI srl.
